PRODUCT MANUAL

TBS6909-X V2

TBS6909-X V2

Product Overview

TBS6909-X V2 is a powerful DVB-S2X / S2 and annex M octa tuner card with PCI Express interface, it not only supports receiving SD / HD digital TV channels from 8 different satellite transponders simultaneously, but also supports CCM, ACM, VCM and Multi Input Stream, which is considered a professional TV tuner for industrial level users. When you have limited PCIe slots in your server, TBS6909-X V2 allows you to receive more channels than usual dual or quad TV tuner, so it is highly recommended for broadcast systems.

Main Characteristics

Features

- Supports Octa DVB-S / S2 / S2X
- Quick scan functionality for all media
- Supports CCM, ACM, VCM, and multi-input stream
- Broadband support

Applications

- Data reception
- Transmission
- Media monitoring
- Distribution of digital content
